B2B ECOMMERCE

PRESTASHOP 1.6.X TO 1.7.X MODULE

USER GUIDE 1.0

INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of the **B2B Ecommerce** PrestaShop Module. A step by step instruction has been added to this document to help users to install the module on PrestaShop.

This extension will only work on PrestaShop version 1.6.x to 1.7.x. As a safe practice always backup your files and database before installing any module on PrestaShop. If you are looking for someone to install the module, we can do it for you as well. Just go to the link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the module to its full capacity. If you still have questions feel free to contact us on the support platform from where you've bought this module.

If you have any custom requirements feel free to touch base with us.

INSTALLATION INSTRUCTIONS

Compatible - PrestaShop 1.6.x – 1.7.x

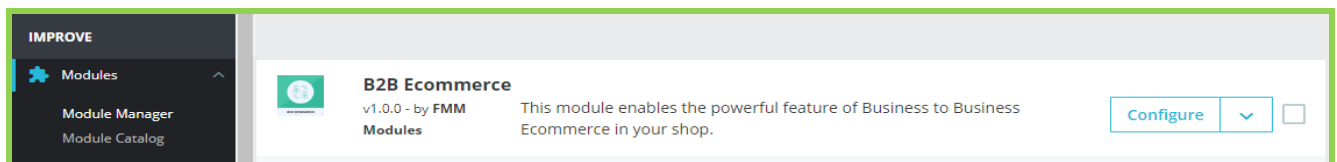

1. Log in to [PrestaShop](#) administration panel, go to [Modules](#) → Click Add new module
2. Select [b2becommerce.zip](#) which you downloaded and click upload this Module
3. Scroll down and find [B2B Ecommerce](#) and click [Install](#). You are done
4. [Clear Cache](#) in [Advance Parameters](#) → [Performance](#)

USER GUIDE

HOW TO CONFIGURE THE MODULE

At the back office, go to **Configure**. You can go there from **IMPROVE > Module > Module & Services**. Here you will find **B2B Ecommerce** installed. Click on the **Configure** button to continue.

Here you will find the following configurations:

GENERAL SETTINGS

As this is a complete B2B Ecommerce module, you can have multiple features to use. You can Disable or completely uninstall any feature if you do not want to use that. You can use the following features in this single module:

- B2B Registration:** Allow your Customers to register for a B2B Account by entering the required information, e.g. personal information, address, company and sign in information. Besides Admin can also add Custom fields according to their specific requirements.
- Product Quotation:** Enabling this feature will allow your B2B Customers to send you quotations for different products.
- Customer Group Restriction:** This module allows the admin to restrict their customers to buy the products from specific categories or from specific pages.
- Payment Restriction:** Admin can restrict different Payment methods for different Customer groups by applying certain rules, for example; a specific group of customers will be bound to pay from a payment method only if they have some specific products in their cart. Admin can apply a number of rules from back office.
- Quick Order Table:** For the customers who want to buy products quickly or in bulk, this feature will be very helpful. As this feature allows the admin to place the products in a tabular form so that customers can choose their desired products by quick selection.

SETTINGS

B2B Registration ▼

Disable Feature *and Offers a custom signup form for B2B customers or wholesalers*

Uninstall Feature

B2B Customer(s) can send you quotation using this module.

Customer Group Restriction ▼

Allow B2B Customer(s) to shop for specific categories/products/cms pages.

Payment Restriction ▼

Disable payment methods for specific cart total ranges, products or categories for your B2B Customer(s).

Quick Order ▼

List products in a fully searchable and sortable table view for B2B Customer(s) for quick shopping.

1. REGISTERING FOR B2B ACCOUNT

Admin can configure basic settings for the customers to register for a B2B Account. In a B2B Registration Tab you will find four sub tabs:

GENERAL SETTINGS

Admin can configure these settings for B2B Account Registration:

- **URL Key for Registration Page:**
<https://b2becommerce.bestprestashopmodules.net/en/b2b>
In this URL, **b2b** is the key used for Registration page
- **B2B Customer Auto Approval:** Enabling this option will allow the customer's account to approve automatically.
- **Disable Normal User Registration**
- **Enable / Disable Custom Fields:** Admin can enable this option to make custom fields on Registration page.
- **Enable Top Link in Header:** Allow a link / button on the front office for redirecting on B2B Account Registration page.
- **Enter Headings for different Information Fields**
- **Add Name Prefix and Suffix:** Admin can add multiple Name Prefix via pop up window and Suffix as well.

A screenshot of a web interface for configuring social titles. The form is titled "Social Titles" and contains two main sections. The first section is labeled "Title" and has a text input field with a light blue border and a small dropdown menu to its right containing the text "en". Below the input field is the text "e.g Mr.". The second section is labeled "Gender" and has a dropdown menu with "Male" selected and a downward arrow. At the bottom right of the form is a green "Save" button.

- Assign Group:** Admin can assign the Registering User to different user groups, like Visitors, Guests, Simple Customer or B2B Customer, etc.
