Getting Started!

Overview

The PrestaShop Custom Gaming Console Builder module allows customers to personalize and build their own gaming consoles directly from your store. With an intuitive, step-by-step interface, users can select components such as console type, storage, controllers, accessories, and more—tailoring their setup to fit their gaming needs and preferences. Ideal for electronics and gaming retailers, this module enhances customer engagement and boosts sales by offering a unique and interactive shopping experience.

Installation Instructions

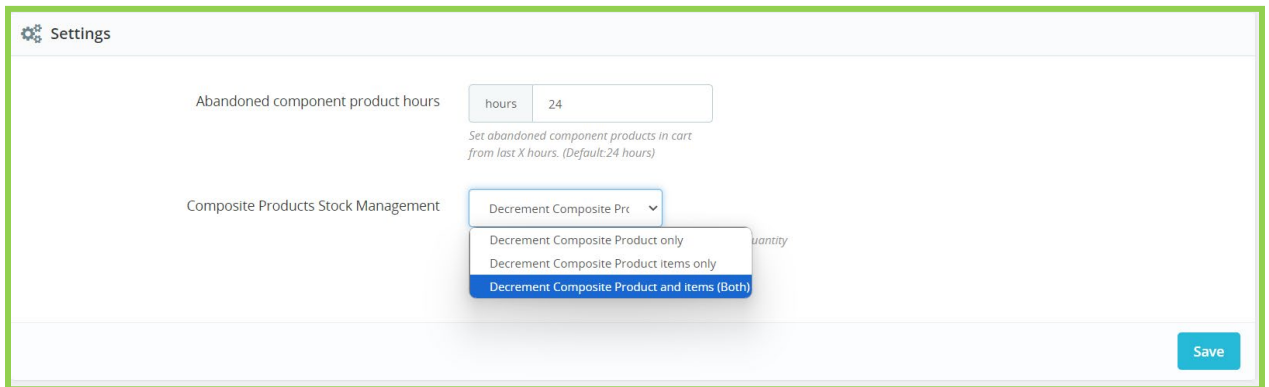

1. Go to Modules → Modules Manager → Click Upload a Module → Browse for Downloaded Module ZIP file and click Upload this module.
2. Click Proceed with Installation.
3. Make sure Cache is disabled in Advance Parameters → Performance.
4. Go to Modules → Modules Manager → PrestaShop Custom Gaming Console Builder to Configure the module

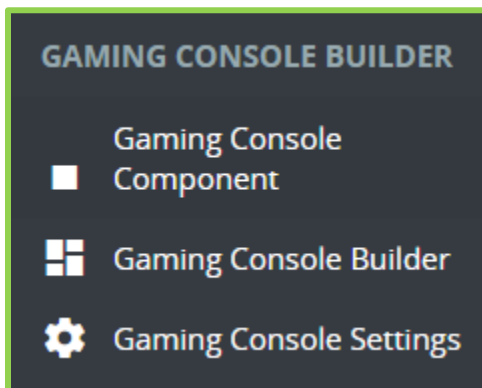

User Guide

Module Configuration

1. After the installation of module, go to module configuration, where you will find following settings.
2. Composite Products Stock Management: Configure how your composite products/product item quantity behaves on a successful order. You can either decrease main composite product only, decrease composite items only or both.
3. You can create a new top menu link for Custom Console Builder by going to Modules > Module Manager > Main Menu.
Use this link to create separate menu for your builder products.
<https://yourstorename.com/builders>

4. After the installation of module, you will see extra tabs on left hand side of your backend panel.

5. First of all, add all the console parts as products in Sell > Catalog > Products
6. Then add components in "Gaming Console Component" tab.
7. Lastly add gift box using "Gaming Console Builder" tab.

Manage Gaming Console Component Tab

1. After adding your console items as products, next step is to create components. In components you will create console component categories i.e If you are creating a console builder that includes controllers, headset and games. Then Controller will be first component that will allow users to select their desired controller from the list of all the seats that you have included in controller component.
2. On left hand side click on “Gaming Console Component” tab.
3. From here you will be able to edit or add new component.

#	Component	Type	Style	Maximum Items	Min Qty	Max Qty	Required	Active	Position		
<input type="checkbox"/>	1	Chocolate	category	thumbnail	4	1	8	✓	✓	+ 2	Edit
<input type="checkbox"/>	2	Jewelry	category	thumbnail	4	1	4	✓	✓	+ 3	Edit
