Getting Started!

Overview

The PrestaShop Multilang Product Image Upload Module simplifies managing product images for stores with multiple languages. It allows merchants to upload images in bulk and assign them to specific language versions effortlessly. With drag-and-drop functionality and language-based organization, this module ensures a seamless, time-saving workflow. Enhance your store's localization and improve the shopping experience by displaying the right images for each language, all with minimal effort.

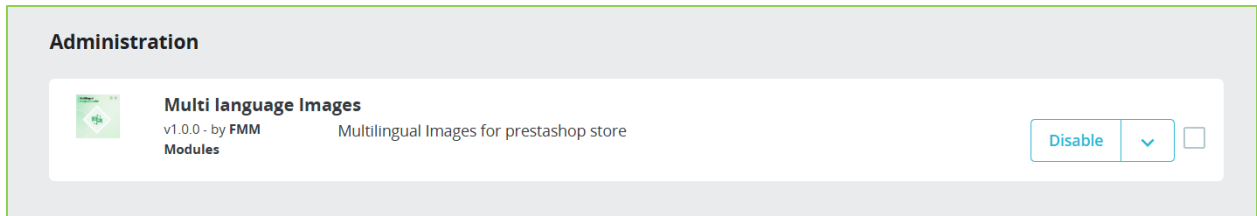

Installation Instructions

1. Go to Modules → Modules Manager → Click Upload a Module → Browse for Downloaded Module ZIP file and click Upload this module.
2. Click Proceed with Installation.
3. Make sure Cache is disabled in Advance Parameters → Performance.
4. Go to Modules → Modules Manager → Labels and Stickers to Configure the module

User Guide

Module Configuration

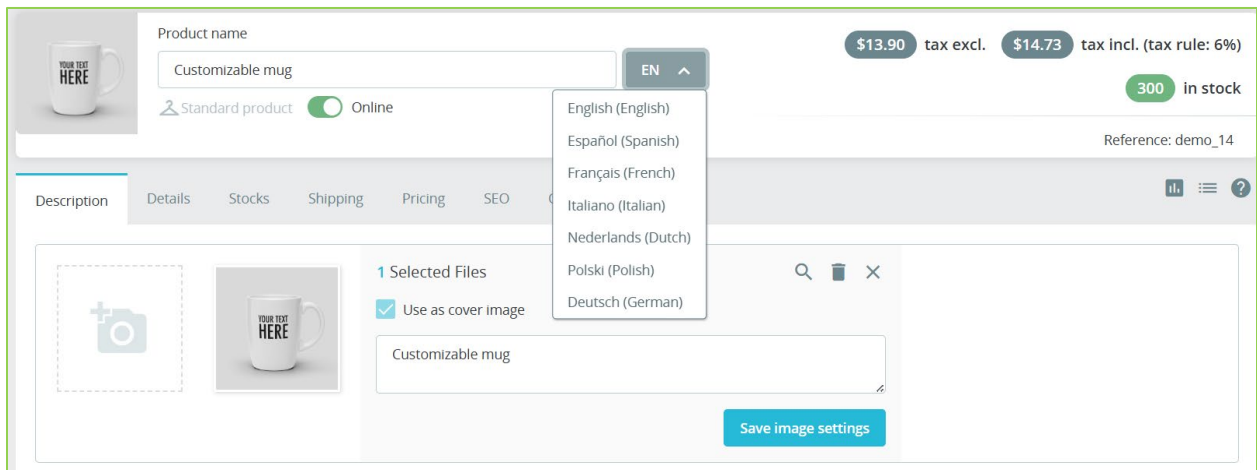

There is no configuration in module configuration. From here you can either disable the module or uninstall it.

Manage Image in Multi Language

1. After you have installed the module and enabled it, you will be able to upload images in multi-language.
2. Upload image in your default languages and then change the language. Now upload your image in that language.
3. Once you have uploaded the image, click on the image to add its caption.

Note: If you are uploading more than one image at a time, then after you have selected and uploaded the image, wait for some time as images upload in backend. At this time some images might not show. Once image upload is complete all your images will be shown instantly. Then go to the next language.

Disclaimer

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

It is recommended you install on a test server initially to carry out your own testing.

Support

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

Customization

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
