# Getting Started!

## Overview

---

The PrestaShop Admin Mobile App module allows store administrators to manage their PrestaShop store directly from their mobile devices. With support for both Android and iOS, you can handle various store management tasks on the go, ensuring your business runs smoothly from anywhere.

## Installation Instructions:

1. Log in to PrestaShop administration panel, go to Modules → Click Add new module
2. Select adminapp.zip which you have downloaded and click Upload this Module
3. Scroll down and find Admin App and click Install.
4. Clear Cache in Advance Parameters → Performance

## User Guide

---

### Module Configuration

After installation, you need to configure the module to connect it with your mobile app:

### Steps to Configure and Connect App and Module

#### Step1: Access the Module:

- After installing module go to **Modules > Module Manager** in your PrestaShop admin dashboard.
- Find the "Admin Mobile App" module and click on **Configure**.

The screenshot shows the 'Settings' page for the FME Admin Mobile App module. The page contains the following configuration options:

- Shop Name:** A text input field with a placeholder 'T' and a note: 'Enter a valid Shop Name - MegaStore'.
- Base URL:** A text input field with a lock icon and the value 'https://adminmobapp.fmemodules.net/'.
- App Logo:** A file upload button with a folder icon and the text 'Add file'. Below it is a preview of the FME logo.
- APP Connection Key:** A text input field with a lock icon, the value 'H3aK8oP6', and a 'Generate Key' button. A note below says: 'Enter a valid Connection Key: H3aK8oP6'.
- API Auth Token:** A text input field with a lock icon, the value 'H3aK8oP6qR2sX9tY56A1bF', and a 'Generate Key' button. A note below says: 'Enter a valid Auth Bearer Token: H3aK8oP6qR2sX9tY56A1bF'.
- Invoice Server Key (Download):** A text input field with a lock icon and a note: 'Invoice Secure Token to download pdf in app'.
- APP QR Code:** A QR code image with a note below: 'It helps to connect to the store automatically without entering your settings, credentials, and store URL every time.'
- Allow Employees:** A section titled 'Select employees who can access the admin app' with a list of employees: 'Moin Abid', 'Jhon Eli', and 'All Smith', each with a checked checkbox.
- Push Order Notification:** A toggle switch set to 'Enabled' with a note: 'Enable Push Orders Notifications'.
- Push Customer Notification:** A toggle switch set to 'Enabled' with a note: 'Enable Push Customer Notifications'.
- Show Product price with tax:** A toggle switch set to 'Enabled' with a note: 'Show product prices with tax'.

## Step2: Fill in Configuration Fields:

- **Shop Name:** Enter the name of your store. This will be displayed on the mobile app.
- **Base URL:** Input the base URL of your PrestaShop store (e.g., <https://www.yourstore.com/>).
- **Store Logo:** Upload your store's logo to personalize your mobile app interface.
- **APP Connection Key:** Generate a unique connection key for your store.
- **API Auth Token:** Generate the API authentication token for secure data exchange.
- **Invoice Server Key (Download):** Enter some confidential key here. This will be used to verify the invoice download option when done from the app.
- **APP QR Code:** This QR code can be scanned to quickly connect the mobile app to your store. Make sure you have already included the above data before scanning the code.
- **Allow Employees:** Select which employees have access to the mobile app by choosing from the list.
- **Push Order Notification:** Enable or disable push notifications for new orders.
- **Push Customer Notification:** Enable or disable push notifications for new customer registrations.
- **Show Product Price with Tax:** Choose whether to display product prices including tax.

## Save Configuration:

- After filling in all the fields, click **Save** to apply your settings.

## Step3: Enabling Web Services

- Go to > Configure > Advance Parameters > Webservices
- Click on "Add new webservice key" on top right hand side
- **Key:** Generate a new key
- **Key Description:** In description add this word, **adminmobapp** . Make sure you enter this key description
- **Enable webservice key:** Enable this key
- **Permission:** Check All for now

The screenshot shows the 'Webservice Accounts' configuration page. The left sidebar is open to 'Advanced Parameters' > 'Webservice'. A red arrow points to the 'Webservice' menu item. The main content area shows a form for creating a new key, including fields for 'Key', 'Key description', and a toggle for 'Enable webservice key'. Below the form is a table for setting permissions for various resources.

Resource	All	View (GET)	Modify (PUT)	Add (POST)	Patch (PATCH)	Delete (DELETE)	Fast view (HEAD)
addresses	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
attachmen	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Step 4: Connecting the Mobile App to Your Store

To use the Admin Mobile App, you need to connect it to your PrestaShop store:

### Download the Mobile App:

- Visit the [this link](#) to get the app from play store.
- Visit [this link](#) to get app from Apple's App Store.
- Download and install the app on your device.

### Connect the App:

- Open the app on your mobile device.
- You will be prompted to enter two pieces of information: **Base URL**, **APP Connection Key** and **Token**. All of these you have already generated in the module configuration on step 1.

### Enter Connection Details:

- **Base URL:** Enter the Base URL of your store (e.g., <https://www.yourstore.com>).
- **APP Connection Key:** You can either manually enter the key or use the **APP QR Code** to automatically fill in the connection details.
  - **To use the QR code:** Click on the QR code icon in the app and scan the QR code displayed in the module configuration on your PrestaShop dashboard.
- **Token:** Enter the API Auth Token key you have generated in module configuration.

### Verify Connection:

- Once the connection details are entered, tap **Connect**.
- The app will verify the credentials and, upon success, connect to your store.

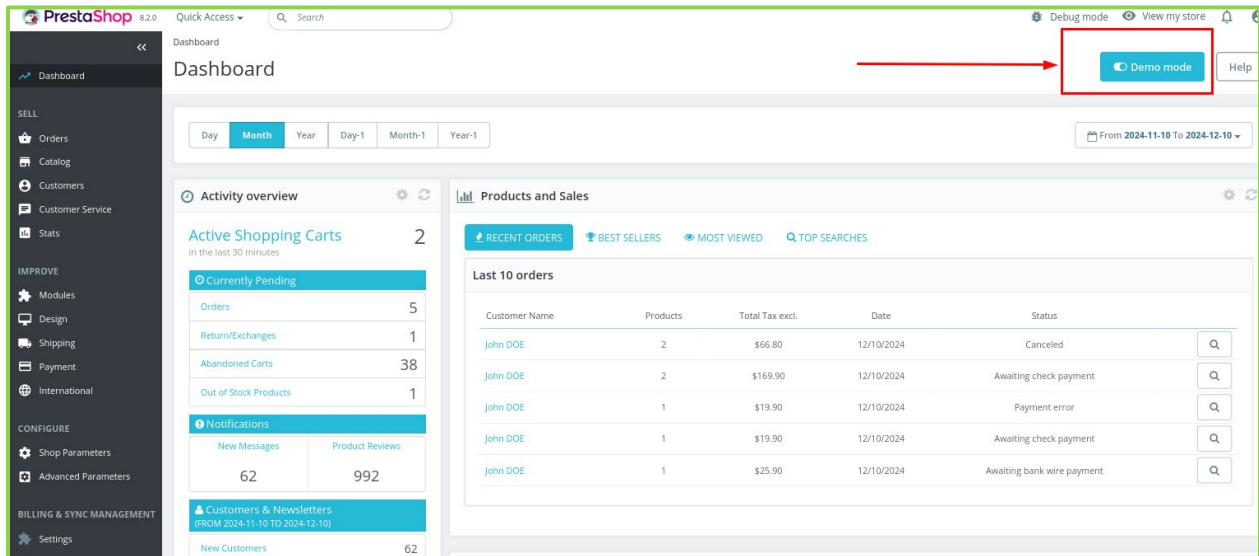

### Sign In:

- Once your connection is verified you will be shown a sign in screen. Here you will enter the backend login credentials of your Prestashop backoffice.

### Note:

If you are unable to see update stats on app dashbord, make sure demo mode is truned off at the PrestaShop Store Admin backend.

## Disclaimer

---

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

**It is recommended you install on a test server initially to carry out your own testing.**

## Support

---

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

## Customization

---

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
