# Getting Started!

## Overview

---

Boost AOV with the first PrestaShop module powered by OpenAI and Google Gemini. Automatically generate data-driven bundles, SEO descriptions, and professional product collages. Turn your catalog into a profit engine with smart AI recommendations.

Compatible with: PrestaShop 1.7 to 9.x

## Installation Instructions

---

1. Go to Modules → Modules Manager → Click Upload a Module → Browse for Downloaded Module ZIP file and click Upload this module.
2. Click Proceed with Installation.
3. Make sure Cache is disabled in Advance Parameters → Performance.
4. Go to Modules → Modules Manager → AI Product Bundler module

## User Guide

### Module Configuration:

After installing the module go to Module > Module Manager > AI Product Bundler Here you will see all the configuration for your module.

 Settings

AI Provider

API Key

Enter your API key for the selected provider.

Number of Suggestions

Max number of AI complementary product suggestions to return (Default: 8).

Enable AI Sales Analytics  Enabled

If enabled, the module will track bundle sales and identify underperforming (stale) bundles for optimization.

Stale Bundle Duration (Days)

Number of days a bundle remains without sales before being marked as "stale" (Default: 30).

**?** **Vector DB Sync & Update:** To sync and keep your product embeddings updated for the latest catalog changes (reducing API costs), please run this URL manually or setup a cron job:

<https://linkcollection.bestprestashopmodules.net/en/module/fmmsmartaiproductbuilder/cron?token=1402330672>

 Vector Database Sync & Update

Use this tool to synchronize and update your products in the local AI vector database. This ensures the AI understands your latest catalog changes.

**?** Ready to sync & update. Click the button below to start.

**API Key:** Enter your Chat GPT or Gemini API key here

**Note: You need paid APIs.**

To get your API key:

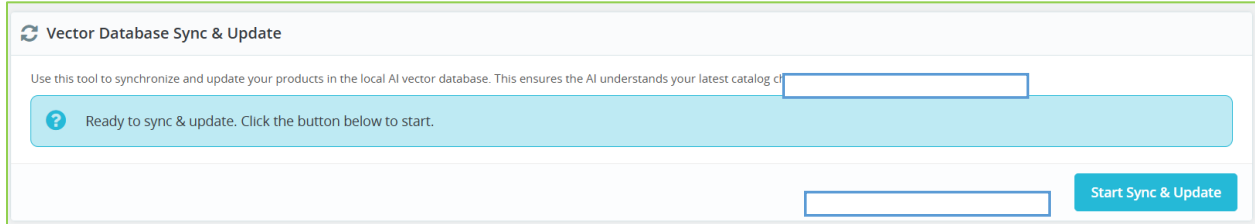

Chatgpt: Click [here](#)

Gemini: Click [Here](#)

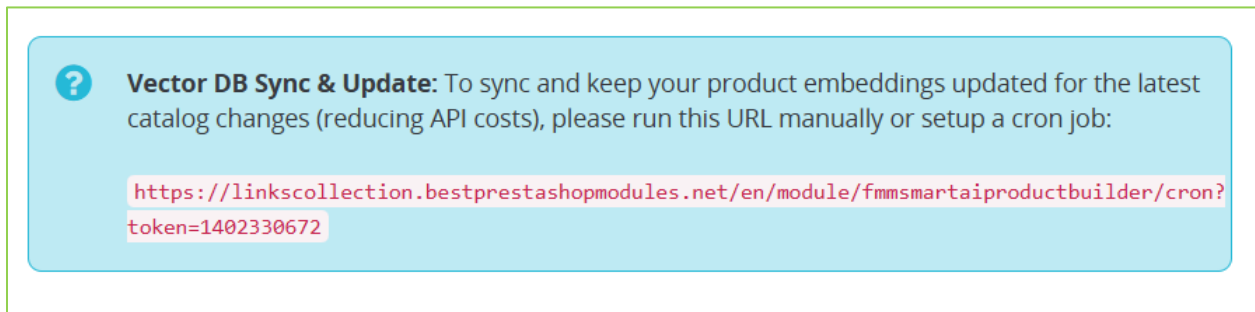

## How to do initial setup:

**Step1:** Once you have successfully added your api key, next step is to generate embeddings. At the bottom of page, you have the option to Sync the database. Click on the button, depending on your store catalog and languages, it can take some.

**Step2:** Next, you need to setup the cron job using the links below. This will allow you to auto generate embeddings. Note that it will only update database for changes and new products being added. Whole embedding will not be generated again.

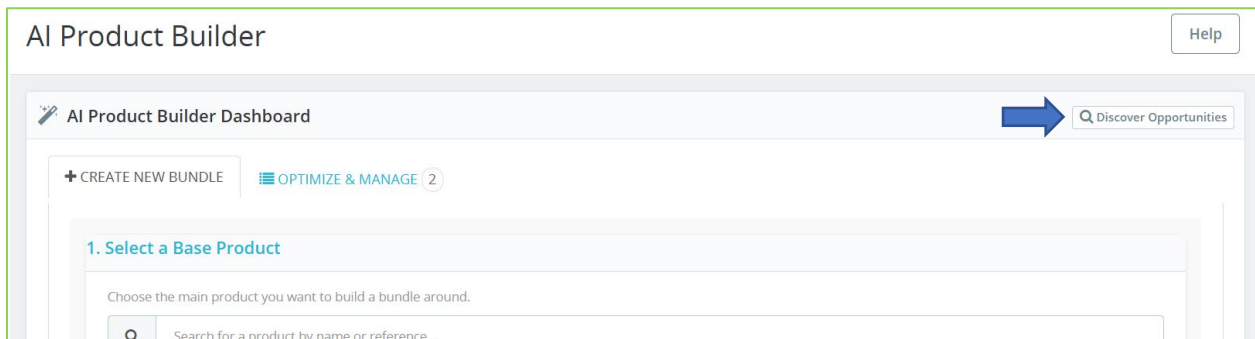

**Step3:** Now you are ready to create your bundle.

## How to create bundle:

Once you have done your initial setup, you are ready to create your bundles.

**Step1:** Go to Sell > Catalog > AI Product Bundle. Here you will be able to create your bundle. You can also click on “Discover Opportunities” button that will auto select the bundles and products.

**Step2:** Select your base products, the bundle will be created around this based product.

### 1. Select a Base Product

Choose the main product you want to build a bundle around.

Mug The best is yet to come  
Reference: demo\_11  
**11.90\$**

How would you like to build this bundle?

USE AI SUGGESTIONS
OR
Manual Selection

**Step3:** Select how you want to create your bundle i.e using AI or Manual creation. Selecting Manual will allow you to select each product manually.

**Step4:** Select AI and then input the number of products in this bundle. If you select 3 the bundle will be of 4 products i.e. one based product and 3 products suggested by AI.

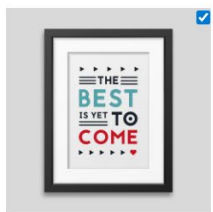

**Step5:** AI will analyze your catalog and suggest most suitable products. You can also manually remove a product or regenerate whole bundle.

### 2. AI Perfect Pairings

4
Regenerate
+ADD MANUALLY

Select a base product first to get AI pairing suggestions.

✔ Found 4 smart pack suggestions via AI!

Pack Mug + Framed poster  
**\$35.00**  
Selected by Smart AI

**Step6:** Next you need to add content for this bundle. Here you can also use AI to autogenerate content.

**3. Bundle Details & Creative Content**

Generate or edit the final bundle details.

Bundle Name  en ▾

Description  en ▾

Meta Title  en ▾      Meta Description  en ▾

**GENERATE ALL CONTENT WITH AI**

This will generate Name, Description, and SEO for all languages in one go.

**Step7:** Next you need to set the pricing of module. AI will also suggest you the appropriate discount.

**4. Pricing Strategy**

Review totals and set the final bundle price.

COMBINED RETAIL PRICE <b>116.80\$</b>	AI SUGGESTED DISCOUNT <b>0%</b> <small>Suggest</small>	CUSTOMER SAVES <b>0.00\$</b>	FINAL BUNDLE PRICE <b>116.80\$</b>
--	--	---------------------------------	---------------------------------------

Override Discount %%

%

**Step8:** Next you need to set the image of the bundle. You can use auto collage creation option that will be generate a perfect collage of all your products.

**Bundle Cover Image**

- Generate Even Grid Collage (All items same size)
- Use base product image only
- Upload custom composite image

**Live Preview**

**Publish Bundle as Product Pack**

**Step9:** Next click on publish. The bundle will be published. You can view and edit the bundle by going to Catalog > Products. There will be able to edit the bundle like any other product.

## Bundle Analytics:

To view how your bundles are performing go to , Sell > Catalog > AI Product Bundle > Optimize and Manage

Here you will see bundle sales, revenue and stale bundle.

The screenshot displays the 'AI Product Builder Dashboard'. At the top, there is a search bar labeled 'Discover Opportunities'. Below it, there are two main navigation tabs: '+ CREATE NEW BUNDLE' and 'OPTIMIZE & MANAGE | 2'. The dashboard features four summary cards: 'TOTAL BUNDLES PUBLISHED' with a value of 2, 'TOTAL BUNDLE SALES' with a value of 0, 'BUNDLE REVENUE' with a value of \$0.00, and 'STALE BUNDLES' with a value of 0. Below these cards is a table with the following data:

Bundle Name	Created	Sales	Revenue	Status	Actions
Inspiration Bundle	03/12/2026 02:14:00	0	\$0.00	Active	Edit
	03/12/2026 02:06:50	0	\$0.00	Active	Edit

## Disclaimer

---

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

**It is recommended you install on a test server initially to carry out your own testing.**

## Support

---

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

## Customization

---

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
