Mandatory File Upload Module

PrestaShop 1.5.x to 1.7.x Module

User Guide 1.0

Intended Audience

The content of this document is designed to facilitate the users - managers, supervisors and others of **Mandatory File Upload** PrestaShop Module. A step by step instruction has been added to this document to help users to install the module on PrestaShop.

This extension will only work on PrestaShop version 1.5.x to 1.7.x. As a safe practice always backup your files and database before installing any module on PrestaShop. If you are looking for someone to install the module we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand on how to use the module to its full capacity. If you still have questions feel free to contact us on the support platform where you bought this module.

If you have any custom requirements feel free to touch base with us.

Getting Started!

Overview

PrestaShop Mandatory File upload module gives admin option to force a file upload from visitors. The "Add to Cart" button will only appear after visitor uploads a file.

Features

PrestaShop Mandatory File Upload module makes it easy for merchants to clearly understand the visitor requirements regarding a product by letting them upload a file. The file can be a text document or an image. Admin has option to add new file extensions i.e .pdf, .psd etc.

This module is an essential requirement in the scenarios where input from the user or client is required. Mandatory file upload forces the user to upload a file by removing the "Add to Cart" button. Only when the user uploads a file, he/ she then be able to proceed with the order.

The merchants can enable this module on a single product. There is also an option to enable "Mandatory File Upload" on the whole category.

With extremely well designed and easy to use BO, the merchant can customize module, select products and see the entire file uploaded by the customers. Admin can filter files by specific date range. From BO admin can download and delete files uploaded by users.

Key Features of PrestaShop Mandatory File Upload Module

- Add to Cart button will only be available after file upload
- Allow customers and/or guests to upload files
- Enable force upload on a specific product or whole shop
- Option to enable force file upload a specific category
- Configure max file size
- Enable uploading of PDF, JPG, PNG, DOC, etc
- Select accepted file extensions
- Easily upload any new file extension
- Admin can download or delete file uploaded by the customer
- The customer can upload more than one file
- Search uploaded files by specific date range

See Demo for quick view or contact us if you have any questions.

Installation Instructions

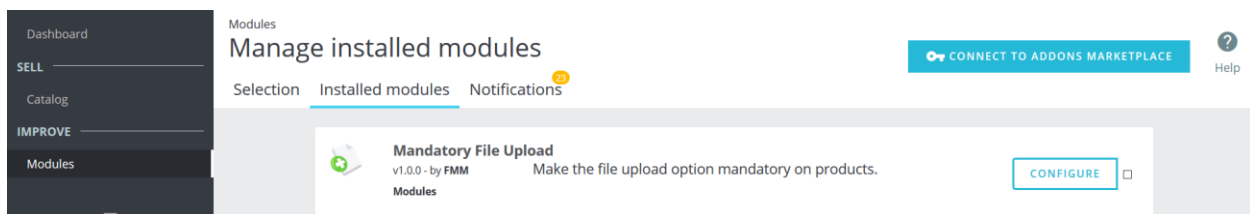

Compatible - PrestaShop 1.5 – 1.6.x

1. Log into **PrestaShop** administration panel, go to **Modules** → Click Add new module.
2. Select **FMM_MandFileUpload_Mod_1.7.1.zip** which you downloaded and click upload this Module.
3. Scroll down and find **Mandatory File Upload** and click **Install**. You are done
4. **Clear Cache** in **Advance Parameters** → **Performance**.

User Guide

How to Configure the Module:

At the back office, go to “**Module & Services**” and click on the “**Installed Modules**” tab. Here you will find you module. Click on “**Configure**” to continue.

Here you will find the following configurations:

Settings

- **Enable Module:** Enable/Disable the Module.
- **Enable on Product Page:** Enable/Disable the Module on Product Page
- **Apply On:** Apply Module on Specific Products or All Products.
- **Enable on Main Page:** Enable/Disable the Module on Main Page.
- **Max File Size:** Specify the Maximum File Size that Users Can Upload.

- Customer's Records

The screenshot shows the 'Configure Mandatory File Upload' interface. On the left is a dark sidebar with navigation options: Dashboard, SELL, Catalog, IMPROVE, and Modules. The main content area has a breadcrumb trail: Modules / mandatoryfileupload / Configure. Below this is a 'Configure Mandatory File Upload' header with utility icons for Back, Translate, Check update, and Manage hooks. A secondary navigation bar contains links for Back, Summary, All Records, Guests Records, and Customers Records. The main content area features a table with columns for ID, Title, File, Upload Date, Download, and Delete. The table contains three entries:

ID	Title	File	Upload Date	Download	Delete
5	Title	index_1538657570.jpeg	2018-10-04 08:52:50	Download	Delete
7	Title	index_1538658685.jpeg	2018-10-04 09:11:25	Download	Delete
13	Title	Asset 1_1539344010.png	2018-10-12 07:33:30	Download	Delete

Below the table, it indicates 'Showing 1 to 3 of 3 entries' and provides pagination controls: First, Previous, 1, Next, Last.

Admin(s) can download / delete uploads here.

Disclaimer

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

It is recommended you install on a test server initially to carry out your own testing.

Support

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

Customization

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
