CSV Imports

Option to add store using CSV file. Admin can upload a CSV file having all the store locatio that will be added automatically.

A screenshot of the 'CSV IMPORT' settings page in the FME Store Locator. The page is titled 'SETTINGS' and has a navigation bar with tabs for 'GENERAL', 'MAP SETTINGS', 'STORE SETTINGS', 'PICK UP SETTINGS', and 'CSV IMPORT'. The 'CSV IMPORT' tab is selected. Below the navigation bar, there is a 'CSV Separator:' label followed by a text input field containing a semicolon (;). Below the input field, there is a note: 'This will be only used during import of stores through CSV file.'

Disclaimer

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

It is recommended you install on a test server initially to carry out your own testing.

Support

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

Customization

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
