PRESTASHOP MODULE

USER GUIDE

INTENDED AUDIENCE

The content of this document is designed to facilitate the users -managers, supervisors, and others of the PrestaMobApp PrestaShop Module. A step by step instruction has been added to this document to help users to install the module on PrestaShop.

As a safe practice always backup your files and database before installing any module on PrestaShop. If you are looking for someone to install the module we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the module to its full capacity. If you still have questions feel free to contact us on the support platform where you bought this module.

If you have any custom requirements feel free to touch base with us.

INSTALLATION INSTRUCTIONS

Get a mobile application for your online store with the following three steps using the PrestaShop Mobile app builder.

Step 1: Download and Install PrestaMobApp Module from Prestashop Addons or FME modules and install it on your store.

Step 2: Fill a prereq form provided by us and share it back. The prereq form contains a key that you will get after installing the module and some basic information i.e app name, logo etc. They key can be obtained from API Settings in backoffice.

Step 3: Receive APK/IPA files containing your fully build app from us within three days

Step 4: Publish API/IPA on android and apple app stores

Note: Contact us anytime if you fail to understand or complete any stage.

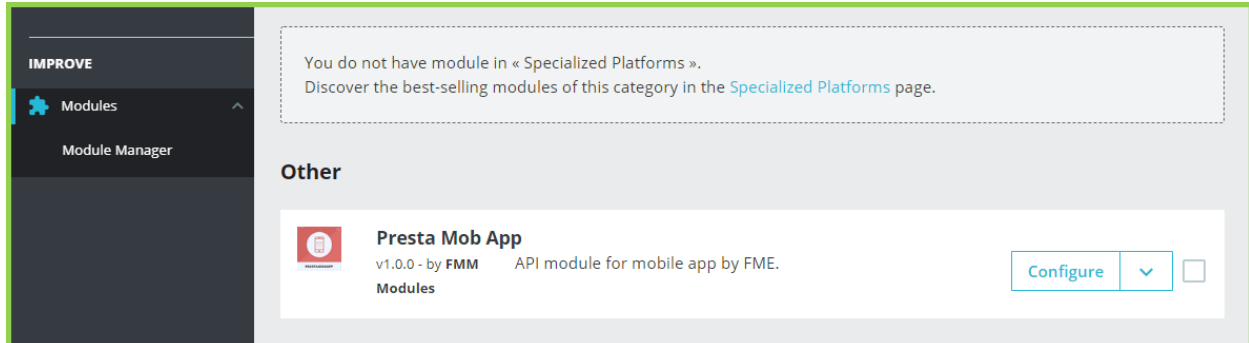

Third-Party charges may apply.

USER GUIDE

HOW TO CONFIGURE THE MODULE

At the back office, go to Presta Mob App. You can go there from IMPROVE > Modules > Modules Manager > Presta Mob App.

Click on Configure to Continue.

Here you will find the following configurations:

API Settings Tab

Settings

ID	Image	Title	Page	Date	Action
1		demo	Category 0	2021-10-13 07:59:42	Delete Send
2		demo1	Product 0	2021-10-13 08:00:29	Delete Send

FAQ CATEGORIES

Here you will be able to create categories for your FAQ page.

Settings

Enter FAQ Category Title

Enter FAQ Category Description

No Record Found

FAQ QUESTIONS

Here you will be able to add FAQ questions and answers and then associate it with the categories you have created above.

A screenshot of the 'Settings' page for adding FAQ questions. The form includes a text input for the question, a rich text editor for the answer, a toggle for displaying the question in the app, and a dropdown for selecting a category. A 'Save' button is located at the bottom right of the form. Below the form, a message states 'No Record Found'.

- Enter Question: Enter Question here
- Enter Answer: Write answer here
- Display This Question in App: Enable show this FAQ in app
- Select Question Category: Select the category to which you want to associate this question.

TRANSLATIONS

As our module is multi-lingual supported admin can translate the field labels into other language.

DISCLAIMER

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

It is recommended you install on a test server initially to carry out your own testing.

SUPPORT

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

CUSTOMIZATION

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
