Getting Started!

Overview

PrestaShop Product Quick View module allows your website visitors to shop quickly. This module provides them product quick view on home and category pages where they can also checkout quickly. Product details are shown on a light box, this popup window opens up by clicking on the 'Quick View' button that is visible when customers mouse their mouse over a product image.

Features

PrestaShop Quick View Module allows your website visitors to read product details such as description, reviews, images etc., and place orders from home/category pages without visiting a product page. Product information along with checkout links is shown on a light box. Customers can update product quantity, view images, and select different product options. This allows them to place quick orders and hence save their valuable time.

Quick view PrestaShop plugin shows "Quick View" button over product image on mouse over. You can change the text and image for this button. When customers click on it, a popup window opens up which shows product details and checkout links. In this way, your customers can have a quick look on your products whether they are on the home page or category page.

Key Features of PrestaShop Quick View

1. Allows your customers to shop quickly on one page, and without visiting a product page.
2. Works on all pages of your website.
3. Shows 'Quick View' button when the mouse is over a product image.
4. You can change the text and icon for quick view button.
5. Product details are shown on a light box/popup window. This light box shows all details that are available on a product page such as description, reviews, and add to cart links.
6. Add products to the cart from the same window (light box).
7. Configurable width for light box
8. Built-in feature to show product tabs on light box
