PRESTAMOBAAPP

PRESTASHOP MODULE

USER GUIDE

INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of the **PrestaMobApp** PrestaShop Module. A step by step instruction has been added to this document to help users to install the module on PrestaShop.

As a safe practice always backup your files and database before installing any module on PrestaShop. If you are looking for someone to install the module we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the module to its full capacity. If you still have questions feel free to contact us on the support platform where you bought this module.

If you have any custom requirements feel free to touch base with us.

INSTALLATION INSTRUCTIONS

1. Log into **PrestaShop** administration panel, go to **Modules** → Click Add new module
2. Select **webapi.zip** which you downloaded and click upload this Module
3. Scroll down and find **PrestaMobApp** and click **Install**
4. **Clear Cache** in **Advance Parameters** → **Performance**

USER GUIDE

HOW TO CONFIGURE THE MODULE

At the back office, go to **PrestaMobApp**. You can go there from **IMPROVE > Modules > Modules Manager > PrestaMobApp**.

Click on **Configure** to Continue.

Here you will find the following configurations:

API Settings Tab

- **Enable Error Log:** Enable if you want to see the log for debugging.
- **Theme Color:** Choose color for your app theme.
- **Enable Slider:** Enable to show slider, upload files using “Upload Slider files” on right hand side.
- **Enable Mobile Logo:** Enable to use customizable logo for your app. Upload your logo using “Upload Logo Files”.
- **Enable New Products:** Enable to show New Products section on top.

- **Enable Popular Products:** Enable to show popular Products section.
- **Enable Best Sale Products:** Enable to show Best Sale Products.
- **Enable ON Sale Products:** Enable to show On Sale Products.
- **Enable Grid Banner:** Upload grid banner images using “Upload Banner Files” option on right hand side.
- **Enable Category Slider:** Enable to show categories as slider, choose categories using “Update Category List” option on right hand side.

Key Configuration

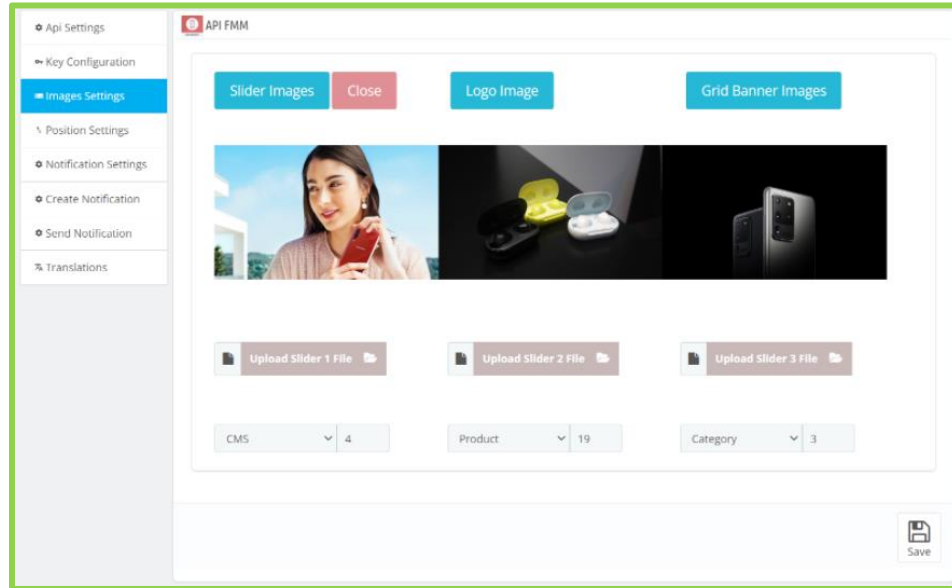

This section bounds your app with your backend. Generate the key and then send it back to us in your prereq form.

ID	Key	Status	Description
1	EAHCLMCD6I7N7A130ED69PD39P70BM94	✓	

Image Settings Tab

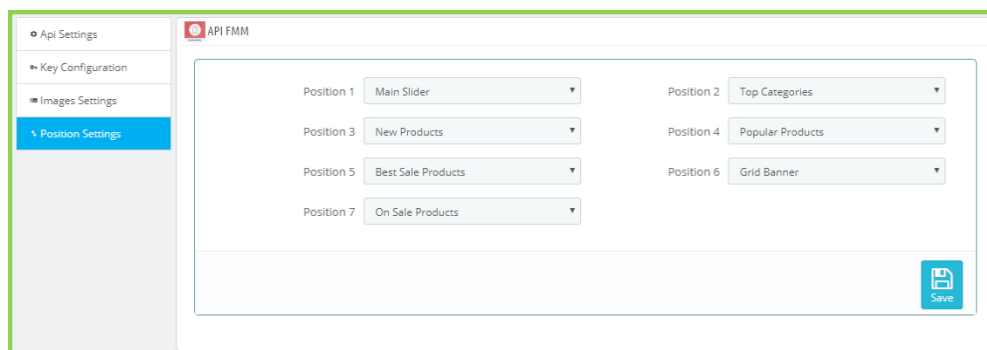

This section enables you to upload image files for your app. Can also be access from API Settings tab.

- **Slider Image:** To upload images for slider click on Slider Images.
 - You can also link a image to product, cms or category page.
 - Select the page type and then enter the ID for that page
- **Logo Image:** To upload logo click on Logo Image.
- **Grid Banner Image:** To upload grid banner click on Grid Banner Images.

Position Settings Tab

The app layout is divided into 7 positions. Admin can select which slider to show at what positions. Position 1 is at the top then comes Position 2 so on and so forth. You need to have products in the selected option to work. If there aren't any products in New Products, then the slider will not be shown.

NOTIFICATION SETTINGS

PrestaMobApp offers push notifications which can allow you to send push notifications to all your clients that have your app installed. Go to [Modules Manger > Installed Modules > PrestaMobApp > Configure > Notification Settings](#)

The screenshot shows a configuration page for notification settings. It contains two sections. The first section is for 'Create order push notification' and includes: a text input for 'Firebase Server Key', a text input for 'Sender ID', a toggle for 'Enable Notifications' (set to 'YES'), a text input for 'Title for Create Order', and a text area for 'Message for Create Order'. The second section is for 'Order status change push notification' and includes: a toggle for 'Enable Notifications' (set to 'YES'), a text input for 'Title for Order status change', and a text area for 'Message for Order status change'. The entire form is enclosed in a green border.

- **Firebase Server Key:** Enter your Firebase Server Key
- **Sender ID:** Admin can add Sender's ID here.
- **Enable Notifications:**
- **Title for Create Order:** Title for the create order notification which will be shown when user orders some item.
- **Message for Create Order:** Message for the order notification.
- **Enable Notifications:** Option to enable/disable notifications for Order Status Change. Will be shown to the user whenever his/ her ordered product status is changed i.e. from shipping to delivered.
- **Title for Order Status Change**
- **Message for Order Status Change**

CREATE NOTIFICATION

From here you can create the custom push notifications which you can send anytime you want.

- **Title:** Title for the push notification.
- **Push Notification Message:** Message for the push notification.
- **Redirect Page:** User will be redirected to this page after he/ she taps on the push notification. Select page type and then the page ID.
- **Push Notification Image**

SEND NOTIFICATION

Admin can send notifications from here; also there is an option to delete the notifications. Push send and the notification will be pushed to all users who has your app installed.

ID	Image	Title	Page	Date	Action
1		demo	Category 0	2021-10-13 07:59:42	Delete Send
2		demo1	Product 0	2021-10-13 08:00:29	Delete Send

TRANSLATIONS

As our module is multi-lingual supported admin can translate the field labels into other language.

Home	Categories
Cart	Account
