Getting Started!

Overview

With PrestaShop Language Switcher module, you can brilliantly manage your eCommerce website by changing the standard language to a native language. Start logging into your website, add products, review orders, and use the entire admin panel in a language of your own.

Features

PrestaShop Language Switcher module allows webmasters, admin, and managers to easily switch to a native language either they log-in to your eCommerce website or have to update it from the back-office.

The module is specifically developed to assist them in operating an eCommerce website in a language they know and understand. The international languages like English and French prove to be a barrier in understanding various features, functions, and other operations of the eCommerce application.

With the help of this module, you can improve efficiency and performance by skipping the need to learn a non-native language. This results in better efficiency and performance.

Key Features

- Enables Language Switching on the admin login page
- Enables Language Switching for the control panel

How PrestaShop Language Switcher module benefits you?

The core benefit of this module is empowering the merchants to manage their online business in a language they are most familiar with. You are no longer required to learn and understand a global language to sign-in and update your eCommerce website.

See Demo for quick view or contact us if you have any questions.

Installation Instructions

Compatible - PrestaShop 1.5 – 1.6.x

1. Log into [PrestaShop](#) administration panel, go to [Modules](#) → Click Add new module.
2. Select [languageswitcher.zip](#) which you downloaded and click upload this
