

FME Modules

**PrestaShop 1.6.x To 1.7.x Module
User Guide 1.0**

INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of the **Add Text to Product Image** PrestaShop Module. A step by step instruction has been added to this document to help users to install the module on PrestaShop.

This extension will only work on the PrestaShop version 1.6.x to 1.7.x. As a safe practice always backup your files and database before installing any module on PrestaShop. If you are looking for someone to install the module, we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the module to its full capacity. If you still have questions feel free to contact us on the support platform where you bought this module.

If you have any custom requirements feel free to touch base with us.

INSTALLATION INSTRUCTIONS

Compatible - PrestaShop 1.6.x - 1.7.x

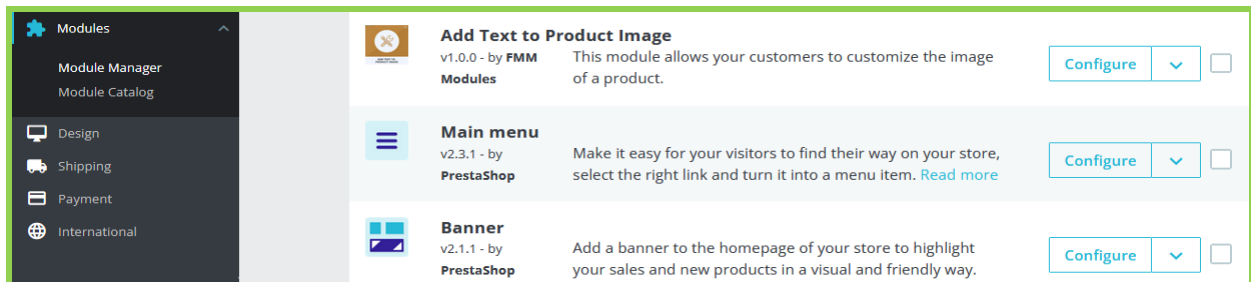

1. Log in to **PrestaShop** administration panel, go to **Modules** → Click **Add new module**
2. Select **v1.0.0addtexttoproductimage.zip** which you have downloaded and click **Upload this Module**
3. Scroll down and find **Add Text to Product Image** and click **Install**.
4. **Clear Cache** in **Advance Parameters** → **Performance**

USER GUIDE

HOW TO CONFIGURE THE MODULE

At the back office, go to **Modules > Module Manager > Add Text to Product Image**. After installing the module, the first step is to add the design assets, fonts and colors for the module library. Simply you need to upload them.

MODULE CONFIGURATIONS

GENERAL

Admin can configure basic settings of the module by clicking the General tab from left side of the page.

A screenshot of the 'GENERAL' configuration page for the FME module. The page has a green border and a title 'GENERAL' with a gear icon. It contains five configuration items: 'Preview Image Width' (input field with '200' and 'px' unit), 'Preview Image Height' (input field with '200' and 'px' unit), 'Default Color' (dropdown menu with a note 'Please create Colors from tab in left section.'), 'Default Fonts' (dropdown menu with 'Open Sans' selected and a note 'Please create Fonts from tab in left section.'), and 'Enable Hints on Front' (radio buttons for 'YES' and 'NO', with 'NO' selected).

- **Preview Image Width:** Admin can set the image width for design preview in the cart.
- **Preview Image Height:** Admin can set the image height for design preview in the cart.
- **Default Color**
- **Default Fonts**
- **Enable Hints on Front:** Admin can enable hints option for the ease of users.

PRE MADE DESIGN

- **Enable Pre-made Designs:** This option will show premade designs for each product that admin has configured. Its recommended to Enable this option.
- **Show Designs Relative to Product:** This option will only show premade design for that particular product which the user is currently customizing. Its recommended to Enable this option as well.

The screenshot displays two sections of the settings interface:

- PRE MADE DESIGNS:** Contains two toggle switches. The first, 'Enable Pre-Made Designs', is currently set to 'YES'. The second, 'Show Designs Relative to Product?', is currently set to 'NO'. A note below the second toggle reads: 'If this option is enabled than designs made on the product will be shown only otherwise all will be visible.'
- WATERMARK SETTINGS:** Contains several fields:
 - 'Enable Watermark on PDF' toggle switch, currently set to 'NO'.
 - '* Watermark Text' text input field containing the value 'Developer'.
 - '* Watermark text size' text input field containing the value '50', with a 'px' unit indicator and a note below stating 'Default size is 50.'.
 - 'Watermark text color' color picker field showing the hex code '#333333'.

WATERMARK SETTINGS

- **Enable Watermark on PDF:** Admin can enable watermark option on the downloaded PDF.
- **Watermark Text, Texe Size and Text Color**

FONTS

Admin can add multiple fonts. Fonts format should be .tff

FONTS 4				
	ID	Font Name	Status	
<input type="checkbox"/>	1	Farsan Regular	✓	Delete
<input type="checkbox"/>	2	DFISSINA	✓	Delete
<input type="checkbox"/>	3	BRIZEL	✓	Delete
<input type="checkbox"/>	4	Open Sans	✓	Delete

Bulk actions ▾

COLOURS

Admin can add multiple colors. Option to select the color from color select panel or by pasting hexcode.

ADD COLOR

Color Name
Greenish

Color Code
#00eb93

DYNAMIC PRICING

Instead of assigning cost to each design element separately you can also use dynamic pricing option. Dynamic pricing option enables you to assign a price according to the range of the design elements. i.e. If user adds up to 3 design elements the price will be \$2 each and for 3 - 6 design elements the admin can assign price for each element as \$3. You can add multiple price intervals.

DYNAMIC PRICING

Enable Layer addition on Front YES NO

? Add interval rules below for dynamic pricing of elements the user will add on front.

Qty From: <input type="text" value="1"/>	Qty To: <input type="text" value="10"/>	Price: <input type="text" value="0.990000"/> \$		<input type="button" value="+ Add Interval"/>
Qty From: <input type="text" value="11"/>	Qty To: <input type="text" value="11100"/>	Price: <input type="text" value="1.800000"/> \$		

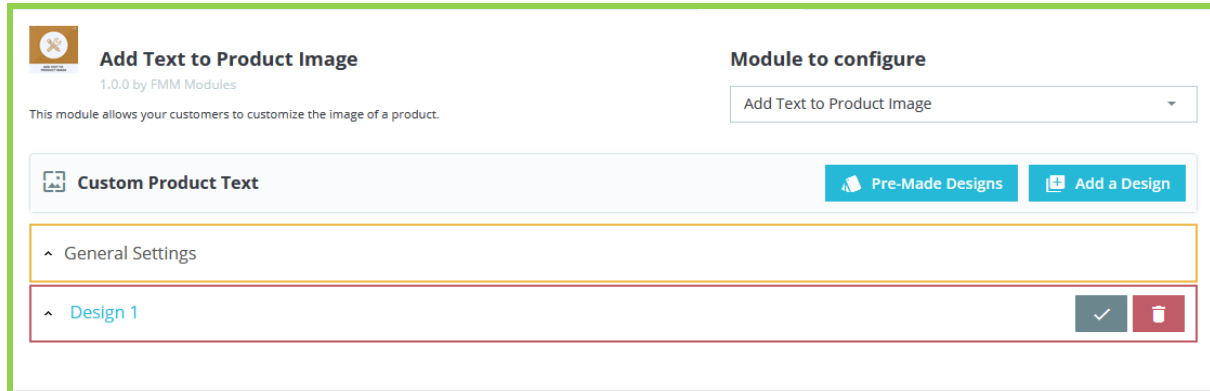

Save

- **Enable Layer addition on Front:** This will allow users to add new design elements without restriction
- Select the range and price for each design element in that range.

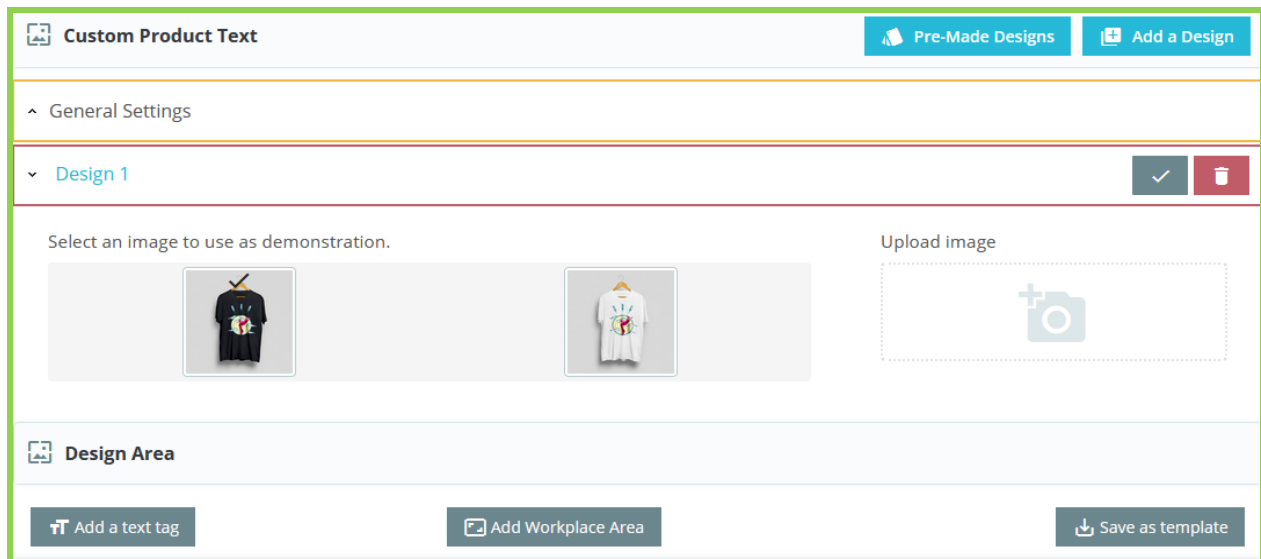

PRODUCT CUSTOMIZATION SETTINGS

After module installation each product will have an extra tab, from where admin can specify the setting for this particular product. Admin can access this setting by following this path, [Catalog > Products > Modules > Add Text to Product Image > Configure](#).

ADDING A NEW DESIGN ELEMENT

- Click on “**Add a Design**” from upper right corner.
- Click on new design and edit its name. Give it a convenient name i.e, Shirt FrontSide, Cup BackSide etc.
- Click on new design to expand its setting.
- Select the image for this design.
- You can also upload new images.

ADDING A TEXT TAG

- Click on the “**Add a text tag**”.
- Click on the price of the text tag to define the price for this tag.
- You can also enable/disable “**moveable**” and “**resizable**” options for this tag.
- You can also limit the number of characters that user can input
- Resize and place the text tag anywhere on the product image

Note: User can also add more tags from the frontend. Make sure the option “Enable Layer addition on Front” is enabled.

ADDING WORKPLACE AREA

- Click on the “**Add Workplace Area**” to add an area.
- Place the area on the product image and expand it
- Click on “**Lock Icon**” to lock the area

Note: When user adds the text from the front office, the text will be smaller corresponding to the size of workplace area. It is recommended not to define workplace area so that users can freely resize the text.

PREDEFINED DESIGN TEMPLATES

- Click on “**Save as template**” button.
- A new window will open where admin can add texts and design a template.
- Click “**Save Template**” to save this template
- This template will now be available in the frontend in “**Design Ideas**” section.

DISCLAIMER

It is highly recommended to backup your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

It is recommended you install on a test server initially to carry out your own testing.

SUPPORT

If you need more information or have any questions or problems, please refer to our support helpdesk:

You can log a ticket and a support technician can assist you further.

CUSTOMIZATION

If you have requirements that are not covered by our module and you need to have our module customized, feel free to contact us through support helpdesk.
