HOW TO CREATE AND MANAGE RULES

At the back end, go to Related Product Rules. You can go there from RELATED PRODUCTS > Related Product Rules. Here you will find the list of all the rules on your store. You can add new rules by clicking on Add new Related Products Rules. Click on it to continue.

Here you have to provide the following rule information:

- Active: Enable/Disable the rule
- Title: Only used in the back office
- Select Page: Select where you want to show related products
- Select Rules: Next select the rule type: Following rules are available.

- From (Optional): Please Select Start Date
- To (Optional): Please Select End Date

Next you will select where this rule will be applied. Go to Related Products > Related Products Visibility Criteria. Here you will find following settings:

A screenshot of a web application form titled "Set New Visibility Criteria". The form is enclosed in a light green border. It contains several sections: 1. "Active" section with a toggle switch currently set to "Disabled". 2. "Title" section with an empty text input field and a note below it that says "Only used in backoffice." 3. "Select Rules" section with a list of two options: "Related Products Rules" (unselected) and "Related Products" (selected with a radio button). 4. "Select visibility criteria (Where to display)" section with a list of two options: "Selected Categories" (unselected) and "Specific Products" (selected with a radio button). 5. "Search Product" section with a search icon and a text input field containing the example text "Example: Blue XL shirt".

- Active: Enable to enable this criteria
- Title: Title for this criteria selection
- Select Rule: Select the rule you have created in previous step
- Select visibility Criteria: Select where you want to show related products.

DISCLAIMER

It is highly recommended to back up your server files and database before installing this module.

No responsibility will be taken for any adverse effects occurring during installation.

It is recommended you install on a test server initially to carry out your own testing.

SUPPORT
