PRESTASHOP MODULE

USER GUIDE

## INTENDED AUDIENCE

The content of this document is designed to facilitate the users -managers, supervisors, and others of the Composite Product Builder PrestaShop Module. A step by step instruction has been added to this document to help users to install the module on PrestaShop.

As a safe practice always backup your files and database before installing any module on PrestaShop. If you are looking for someone to install the module, we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the module to its full capacity. If you still have questions feel free to contact us on the support platform where you bought this module.

If you have any custom requirements feel free to touch base with us.

## INSTALLATION INSTRUCTIONS

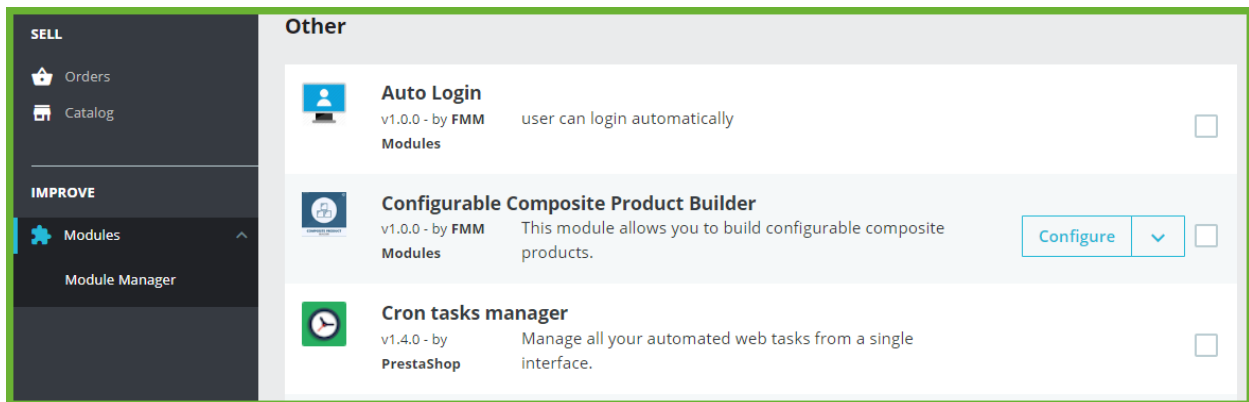

1. Log in to PrestaShop administration panel, go to Modules → Click Add new module
2. Select compositeproductbuilder.zip which you downloaded and click upload this Module
3. Scroll down and find Composite Product Builder and click Install. You are done
4. Clear Cache in Advance Parameters → Performance

## USER GUIDE

### HOW TO CONFIGURE THE MODULE

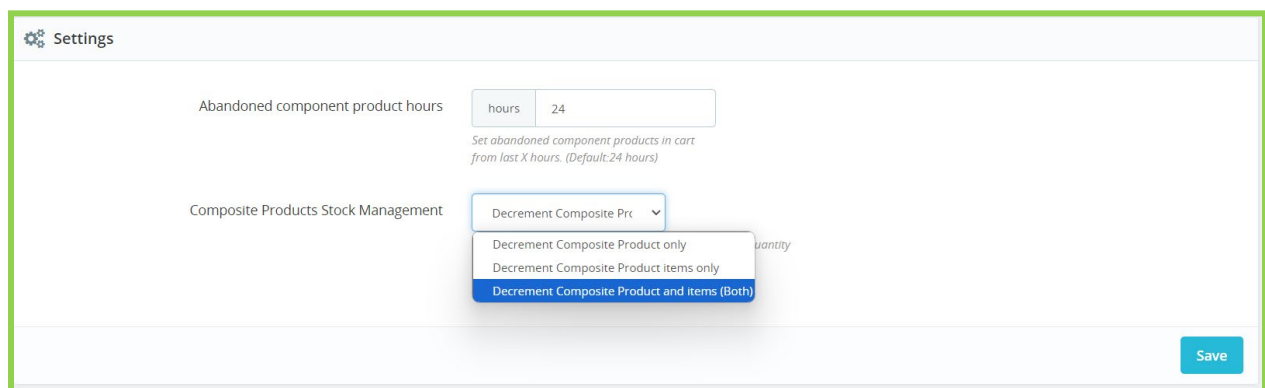

At the back office, go to Module Manager and you will find Composite Product Builder. Click on Configure to continue.

Here you can configure the following:

### SETTINGS

- **Abandoned Component Product Hours:** Set abandoned component products in cart from last X hours. (Default:24 hours)
- **Composite Products Stock Management:** Configure how your composite products/product item quantity behaves on a successful order. You can either decrease main composite product only, decrease composite items only or both.

## HOW TO ADD/EDIT PRODUCT COMPOSITE OPTIONS

It is recommended that you first add all the compiste product items first then create a new product for main Composite product. For example if you want to add a Customizable PC with multiple items then first add components like, RAMs, Graphic Cards and Processor etc. Then create a new product named Customizable PC and edit this product, go to module section to add items to it. At the back office, go to Catalog > Products. Add or Edit main composite Product then select Configurable Composite Product Builder tab as shown below.

The screenshot shows the product configuration page for 'Customizable PC'. At the top left is a product image of a PC case. To its right, the 'Product name' field contains 'Customizable PC' and a language dropdown is set to 'EN'. Below the name, there are two toggle switches: 'Standard product' (disabled) and 'Online' (enabled). A horizontal menu below these options includes 'Description', 'Details', 'Stocks', 'Shipping', 'Pricing', 'SEO', 'Options', and 'Modules', with 'Modules' being the active tab. The main content area is titled 'Choose module related options' and includes a sub-header 'Configurable Composite Product Builder' with a version '2.1.2 by FMM Modules'. A description states: 'This module allows you to build configurable composite products.' A 'Configure' button is located at the bottom of this section.

Next you will see following selections. First of select the main layout from “Layout Option” on top left hand side. There are three options to choose from Simple list, Accrodian and Steps.

**Configurable Composite Product Builder**

2.1.2 by FMM Modules  
This module allows you to build configurable composite products.

Layout Option

Simple List  
Select and customize your component layout on product page.

**Module to configure**  
Configurable Composite Product Builder

**Components** Add Component

Processor	Enabled	Remove
SSD	Enabled	Remove
Graphic Card	Enabled	Remove
PC Case	Enabled	Remove

Now you will add the components, Click on “Add Component” to add a component. Clicking in it you will have to provide the following information to create product composite.

- Name: Name of the component
- Description: Some short description
- Selection Type: Here you will choose how to add products for this component, you can add single products, whole categories or by using tags. Make sure you have already added these items separately.
- Start Typing Here: As you enter words the products will appear.
- Selection Style: Select how these items will be shown inside the components. There are three options:
  - Radio Buttons
  - Dropdown
  - Thumbnails
- Minimum Qty: Select min qty that user will have to select for this component.
- Maximum Qty: Select max qty

- Required: Mark this component selection as mandatory.
