Getting Started!

Overview

This PrestaShop Brands Module displays brands in a scroller on home page within home content. The default functionality is not like this, instead by default these brands are displayed in form of list and not in the home content. Secondly these brands are displayed with images and that is another cool functionality which is not present by default in PrestaShop. Here are the key benefits you get by using this tool on your website.

Features

1. Since merchants feel pride in advertising their products under their brand name, you are promoting them actually. And those brands which are famous will yield more sales for you because brand lovers will be able to directly reach out to their desired products.
2. Brands show strong identity, products advertised with no identity will lack much interest of people
3. Many people would have heard about famous brands and they would like to search their products. By using this tool you are giving them easy way to get to these products
4. It's a free tool, you do not have to pay any thing
5. One click installation and 100% stable

Installation

Step by Step

General Installation instructions

1. Log into Prestashop administration panel, go to **Modules** → Click **Add new module**.
2. Select **fmeblockmanufacturer.zip** which you downloaded and click **Upload this module**.
3. Scroll down and find **FME Manufacturers block** and click **Install**. Your are done.
